EMERGENCY 75 HP VAUGHN PUMP PURCHASE – PURCHASE POLICY LETTER

5 February, 2025

Good afternoon Legal Counsel/Board Members,

This past week, OPUD was made aware of two large influent pumps within our influent (where the wastewater first enters the plant). The existing system is comprised of two(2) small Vaughn Pumps and two (2) 60 HP Pumpex pumps that are on its last legs (these pumps are from when the plant was upgraded nearly 20 years ago. OPUD brought in Wright One to look at the pumps. They were able to repair one (of which it operates at 70% efficiency) but the other one is non-serviceable. With it being wet weather season, it's apparent we get this additional Pump back online. OPUD quickly reach to a supplier for a similar style pump – 75 HP Vaughn Chopper pump and it was determined to be just around \$62,400 which is over our bid threshold. The lead time currently stands at four (4) weeks. With the risk of SSO spillway that could lead to permit violations and fines, it's paramount we order this pump asap. With your approval, OPUD will move forward asap to order the pump.

Please contact me if you have any questions at:

530-743-0317 (office)

530-682-1114 (cell)
