

Olivehurst Public Utility District

Agenda Item Staff Report

Meeting Date: June 20, 2019

Item description/summary:

Discuss request by a commercial/Industrial customer to have wastewater treatment facility and collections system capacity fees reduced if actual flow/strength is less than proposed. A facility that wishes to store wine near the airport has paid their calculated capacity fees based on a wastewater sample obtained from a similar facility in Napa County. The customer has indicated that they wish to take a more representative sample from their facility once up and running and have it analyzed. If the sample yields lower strength wastewater than what they had proposed and paid capacity fees for they are requesting and adjustment in the fees. I believe this is a fair approach providing the fees do not go below our 1 EDU minimum.

Fiscal Analysis:

TBD

Employee Feedback

None

Sample Motion:

Requesting Board consensus.
