

OPUD Board of Directors,

There is a need to replace the dirt in the infields at both Eufay North and South fields. The fields are in rough shape, and our goal is to prevent injury of the many players that utilize them. To achieve this, 2" of the existing dirt will need to be completely removed, and 2" of new dirt will be added. The dirt will be ordered from, and delivered by, Hastie's Capital Sand and Gravel. Interstate Transport will off haul the old dirt. We have two local's that will take the dirt that we remove the same day. We can send their names and addresses if you need them. This project will be performed on a weekend, and it should only take two days. The labor will be completed by volunteers and the adult softball league will be involved as well. With your permission, we would like to drive on the grass for the off haul of the dirt and unloading of the new. We will also use a tractor, a roller compactor, and a skid steer. We will stage and run everything from the South parking lot, that way we are not impeding any kind of traffic. We are hoping OPUD can help with some of the costs related to the project, help with a few dump trucks for the off haul of the dirt, and equipment. PLLL would like to begin this project A.S.A.P. Thank you for your time!

Cost for the new fields:

60/40 field mix is \$70.00 cubic yard at 2" it will be 205 total yards @ \$15,400
Trucking for the removal is \$145.00 hr. @ 12 hrs. \$1,740 a day may need 2 days. \$3,480
Roller compactor \$339.00 a day.
Gene Laser Grading will charge \$6,000 to take out and replace the dirt.

Total cost \$25,219
